Shipping Restrictions: Not Regulated

ALBA[®] Industrial Strength Spot Remover/ Dry Cleaning Fluid

Alba Spot remover is a volatile silicone-based liquid dry spotter for removing all dry oil based stains.

It is safe to use on all fabrics - including acetates. It has a moderate to fast evaporation rate and leaves zero residue. This allows Alba Spot Remover to be used before or after dry cleaning.

The low odor makes Alba Spot Remover a safe and pleasant product to use.

Great for use on clothing, upholstery, drapery, carpeting and more.

Benefits:

- Removes grease, oil & dirt stains.
- Leaves no residue
- Very mild odor & high flash-point
- For use in California & all other states
- Apply by hand or in spotting gun
- Safe for use on all fabrics
- Evaporates completely leaving no residue.
- Does NOT contain trichloroethylene.

Directions for use:

Use Alba Spot Remover to loosen dry side stains, such as: grease, oil, tar, adhesives, paint, lipstick, make up, shoe polis, asphalt, oily salad dressings and other oil-based stains.

Dry Cleaning Directions

PRE DRY CLEANING: Place stained fabric on your spotting board. Put a cleaning white cloth (i.e. cheesecloth or towel) under the stained area. Apply Alba Spot Remover using a spotting gun or by hand using a clean rag, with the vacuum running. Dry spotted area thoroughly, before applying any additional spotters, or placing the garment into the machine for cleaning.

TOUCH-UP SPOTTING: Alba Spot Remover is great for use in removing oily stains that may remain on fabrics after dry cleaning. Apply using a clean cloth and a dry spotting brush or spray through a spotting gun. Rub lightly
